RESEARCH INTERESTS

I am a PhD candidate specializing in Human-Computer Interaction with a focus on personal health informatics, self-tracking, and AI-assisted health interventions. My research explores conversational AI systems for personalized health experimentation and aging populations, with emerging work in stress management and digital wellbeing.
Key interests: Personal Health Informatics & Self-Tracking, Conversational AI for Health Interventions, Self-Experimentation & N-of-1 Studies, Technology for Aging Populations, and Stress Management & Digital Wellbeing.

EDUCATION

University of Massachusetts Amherst, Amherst, MA, USA — August 2023 — May 2028 (Expected)
Doctor of Philosophy in Computer Science — GPA: 3.88/4.0
Advisor: Dr. Ravi Karkar

University of Geneva, Geneva, Switzerland — September 2019 — February 2022
Master of Science in Computer Science — GPA: 5.75/6.0
Thesis: Player Profiling via Physiological Response Analysis in Gameplay

K J Somaiya College of Engineering, Mumbai, India — August 2015 — June 2019
Bachelor of Technology in Electronics and Telecommunication

RESEARCH EXPERIENCE

University of Massachusetts Amherst — Amherst, MA, USA
PhD Student, Manning College of Information and Computer Sciences — August 2023 — Present

- **CASEbot: Conversational AI for Self-Experimentation** - Designed and developed an LLM-powered conversational agent using Rasa framework and Claude 3.7 Sonnet to guide users through designing structured, personalized, and safe self-experiments in health domains. Conducted within-subjects mixed-methods study with 42 participants, demonstrating 19.20% improvement in experiment quality through theory-driven prompt engineering.
- **Digital Support for Dementia Caregivers** - Extracted key caregiver concerns and support needs from 100,000+ posts in Alzheimer's online communities using topic modeling (LDA). Engineered ML classifiers (SVM, Random Forest, Neural Networks) achieving AUC scores of 0.83-0.87 for detecting emotional and informational support patterns.
- **Systematic Review of Technology Needs for Older Adults** - Conducted comprehensive literature review identifying unmet needs of older adults in home settings. Collaborated with interdisciplinary team to synthesize findings and develop evidence-based design recommendations for aging-in-place technologies.

- **Needs Assessment Research with MassAITC** - Conducted 3 focus groups with older adults to assess technology needs and challenges. Synthesized qualitative data to inform design of accessible technology solutions for aging populations.

Koita Centre for Digital Health, Indian Institute of Technology Bombay Mumbai, India
Research Associate April 2022 — June 2023

- **Intelligent OCR for Medical Records** - Implemented joint-learning framework using LayoutLMv1 for OCR and key-value extraction from 15,000+ printed and handwritten medical documents at Narayana Hrudayalaya Hospitals. Achieved high accuracy (Acc: 0.983, F1: 0.945) on real-world healthcare forms, enabling digitization of patient records.
- **Synthetic Medical Image Generation** - Developed GAN and Wasserstein Autoencoder (WAE) models for synthetic pneumonia X-ray generation. Implemented guided subset selection methodology to boost data diversity, improving classification accuracy by up to 21.64% on label-scarce datasets.

University of Geneva Geneva, Switzerland
Data Analyst Intern, Computer Science Department June 2020 — August 2020

- **Player Profiling via Physiological Signals** - Designed comprehensive player profiling pipeline using physiological signals (ECG, EDA, Respiration) and in-game events from 100+ Counter-Strike participants. Applied dimensionality reduction and model-based clustering (LDA, logistic regression) to identify gameplay-driven emotional response patterns.

TEACHING EXPERIENCE

University of Massachusetts Amherst Amherst, MA, USA
Teaching Assistant

- **CS 325: Human-Computer Interaction** Fall 2025
  - Mentored students in course projects involving user research and interface design
- **INFO 490PA: Personal Health Informatics** Spring 2024, Spring 2025
  - Assisted in course delivery covering self-tracking technologies, personal informatics systems, and health data analysis
  - Held office hours, graded assignments, and provided technical support for student projects

PRESENTATIONS & TALKS

- **CHI 2024 Workshop on HCI and Aging**, Honolulu, HI, USA May 2024
  Presented workshop paper: "Exploring the Role of LLMs for Supporting Older Adults: Opportunities and Concerns"

SELECTED COURSES

PhD Courses

- Computing for Digital Biomarkers in Healthcare
- Distributed and Operating Systems
- Neural Networks

Master's Courses

- Information Analysis and Processing
- Software Modeling and Verification
- Natural Language Processing I
- Natural Language Processing II
- Cryptography I
- Cryptography II

RESEARCH SKILLS

- **Machine Learning & AI:** PyTorch, TensorFlow, Scikit-learn, Large Language Model Integration, Transfer Learning, GANs, Autoencoders
- **Natural Language Processing:** Topic Modeling (LDA), Sentiment Analysis, Text Classification, Transformer Models
- **Computer Vision:** Visual-Language Models (VLMs), Image Synthesis, Medical Image Analysis
- **Development & Frameworks:** Python, C++, Rasa (Conversational AI), MongoDB, SQL
- **Research Methods:** Mixed-Methods Research, User Studies, Within-Subjects Design, Qualitative Analysis (Thematic Coding, Focus Groups), Quantitative Analysis (Statistical Modeling, Regression)
- **Tools & Platforms:** Git, Qualtrics, Excel, Prompt Engineering, API Integration (Anthropic Claude)

LANGUAGES

- **English:** Fluent (Professional Working Proficiency)
- **Hindi:** Native
